Technical Capability

BAI's Management and Technical Services (MTS) Group provides engineering, program, and acquisition management support, working in close partnership with our customers in program offices within the Naval Air Systems Command (NAVAIR), Office of the Chief of Naval Operations (OPNAV), and the Joint Strike Fighter (JSF).

BAI's System Engineering Services (SES) Group provides diverse engineering services for Naval mission planning systems, including software/system component development, lab management, program management and program. In addition Brandes support various other Naval Programs within the NAVAIR community by providing engineering, program, and acquisition management support.

BAI's software development team provides rapid design, development, and fielding of software applications to provide tactical decision support for Special Warfare combat environments and high-risk mission planning, such as Automated Decision Support Systems (DSS) for Navy Special Warfare and Tactical Aviation, and Rapid Applications Development for Special Operations forces.

BAI's UAV group provides consulting and operational expertise in UAV operational concepts, manpower, and training requirements, including security-cleared UAV operators for foreign national UAV programs operating within the U.S.

With offices located Patuxent River, Washington, D.C, Fallon, NV, Point Mugu, CA, China Lake, CA and San Diego, CA, BAI is strategically located to support the full range of NAVAIR product development – from concept, management, engineering, and integration through operational testing and fleet support.

Functional Area(s) 3.1, 3.2, 3.3, 3.5, 3.6, 3.7, 3.8, 3.9, 3.10, 3.11, 3.12, 3.14, 3.15, 3.16, 3.17, 3.18, 3.19, 3.20, 3.21

Past Performance

Provides Systems Engineering and Program Acquisition Support to NAVAIR-N00421-00-D-0263-(Vicky Norris, (301) 757-6168).

Provides Interoperability and T&E Support to Joint Strike Fighter PO-F33657-00-C-0016- (Janis Lindgren (760) 939-5706).

Provides Engineering, Software, IT, and Training to SPECWARCOM Sys-F42600-01-D-0027 MPSC-0002- (Nyle Wilcox (757) 878-1050X272).

Provides Engineering, R&M, CM, T&E, Program and Administrative to NAVAIR Systems- N68936-03-D-0041- (Nadine Donner (805) 989-4270).

Provides R&D, Software, and QA Support to SPECWARCOM Sys-N00014-04-C-0017- (Arch Turner (703) 309-5250).
