SAM, Inc. is a woman-owned certified 8(a), HUBZone, and small disadvantaged business with a principal office in Lexington Park, MD. SAM, Inc. is a management and technical support services company providing service to NAVAIR specializing in the areas of program management, Weapon Systems Integration (WSI), systems engineering, acquisition logistics, and test and evaluation. Aviation weapons integration is a critical element of tactical aircraft operations and weapons integration is a core competency of SAM, Inc. Program management and technical support services are currently being provided to PMA201, PMA242, PMA259, AIR-3.1, AIR-3.9, PEO (Integrated Warfare Systems) 3.0, PEO(Weapons), and PEO(Joint Strike Fighter).

SAM, Inc. provides the required levels of support for small/large/unique/joint DoD acquisition programs. SAM, Inc's personnel have extensive experience in successfully delivering first-class support in the areas of program/project management, systems engineering, and acquisition logistics. Employees are currently facilitating the integration of various weapon systems onto all variants of F/A-18 Hornets and Joint Strike Fighters to meet the warfighters' requirements. SAM, Inc's experience covers all aspects of aircraft/store separations ranging from initial store design evaluation, establishing requirements for wind tunnel testing, data requirements, reviewing final data to establish a flight test envelope and plans, aircraft/store instrumentation requirements, review of flight test results for determining operational envelopes, and finally issuing fleet flight clearances. Systems engineering support is provided for surface launched standard missiles. Expertise in flight clearance processing, budget execution, acquisition planning, and timely accomplishment of key milestones and daily events enables cost effective weapon systems integration. SAM, Inc's actions enhance NAVAIR and NAVSEA ability to deliver high quality, affordable products and support to U. S. Navy and Marine Corps forces.
